

Handheld Vibrating Tamper

Description

The handheld Vibrating Tamper for compaction purposes.

Working principle

- * Compacting moulding sand or refractory cement still is a time consuming work considering the manual reworking of automated compaction processes or the handwork for compacting in small or individual forms.
- * The VIBRATING TAMPER is the ideal solution for these kind of applications as it can be used as a handheld compactor and is ready for operation within minutes.
- * The VIBRATING TAMPER outstands for its compact size, light weight and high compaction power. Thanks to different accessories, the power tool can adapt to different requirements, being able to compact or also to remove the refractory materials.

Technical specifications

FREQUENCY : 50 Hz

SYNCHRONOUS SPEED : 3.000 rpm

EXCITING FORCE: 2000N

RATED VOLTAGE: 380V

POWER INPUT : 0.17 kw

WEIGHT : 10 kg
